SUMMARY

I am a front-end developer with a specialization in React.js, Next.js and Tailwind CSS. I bring a proven record of accomplishment of successfully implementing these technologies across a range of projects. Furthermore, my proficiency extends to the backend, where I leverage Express and MongoDB, mongoose to craft robust and efficient solutions.

SKILLS

Technologies

JavaScript, typescript, React.js, Redux, Next.js, ES6, Bootstrap, Tailwind CSS, Tanstack query, Axios, Antd, React router Dom.

Backend Technologies

Express, MongoDB & mongoose, Firebase Authentication, JWT

Tools

Git and Github, Figma, Visual Studio Code

PROJECTS

1. **Meeting Room booking (Mern)**   **View live**   **Code Frontend**   **Code Backend**

- Sign up securely and login with jsonweb token to access exclusive content, personalize and private Content.
- Meeting room booking with slot for specific date and time available individual slot time and date.
- Booking management after paying by stripe payment system. Handle users booking in my booking page. Also admin will be able to manage the booking from admin panel.

Technologies: React.js, Tailwind CSS, mongoose, Antd and Typescript.

2. **BabyCare (Baby-care) –** Group Project   **View live**   **Code-fronted**   **Code-backend**

- Babycare website using react.js, express, MongoDB, tailwind, JWT, and some packages.
- People can purchase and provide baby care services. If someone's added service purchase by another it will be pending then the provider can change the status.
- For Authentication, I used Firebase and JWT for Authorization.

Technologies: React.js, Tailwind CSS, Mongodb, firebase authentication.

3. **NextLeaf (Gardening tips-social Features)**   **View Live**   **Code-Frontend**   **Code-Backend**

- User login register authentication with jwt. Image upload with cloudinary.
- Public will be able to write post & share to public. The will get a user panel where the can watch their progress.

  They can be get verification after payment by stripe. After verification use can publish premium content.

- Admin panel where admin can manage all posts, users, category, admin and all types of report.

Technologies: Next.js, TypeScript, Tailwind CSS & node.js Mongoose or mongodb
